

Title: The Macedonian Language E-Learning Center: Free Interactive Multimedia for Online Language Learning

Author: Biljana Belamaric Wilsey, North Carolina State University

The poster presentation highlights the materials and resources available through the Macedonian Language E-Learning Center <<http://macedonianlanguage.org>>, an innovative nonprofit organization that provides free online multimedia language learning resources for Macedonian. The organization's materials are rooted in second language acquisition pedagogy, distance education and adult learning theories, as well as best practices in instructional technology. By showcasing what is available on the center's website and explaining how and why it was created, the presenter provides instructors of other languages with the groundwork to set up similar pedagogicallydriven online learning websites for other Slavic languages. Participants will have an opportunity to play with the materials themselves in real time.
